

## **Behavioral Scientist/Epidemiologist**

**Behavioral Scientist/Epidemiologist.** The Prevention Development and Evaluation Branch (PDEB) in the Division of Violence Prevention at the Centers for Disease Control and Prevention is seeking candidates for a Social/Behavioral/Health Scientist or Epidemiologist position. The Division supports intramural and extramural violence prevention research projects. Efforts include the prevention of suicide, intimate partner violence, child maltreatment, sexual violence, and youth violence. Individuals with research interests or experience in suicide prevention are preferred. Responsibilities focus on the development, implementation, and evaluation of violence prevention strategies, programs, and policies through independent and collaborative research. The scientist also provides consultation to grantees and other researchers with a focus on the primary prevention of violence. PhD or other terminal degree in psychology, sociology, criminology, or related field required. Competitive salary and benefits.

Interested candidates should send a cover letter, statement of interest, and curriculum vitae to Suzanne Powell either by email (SPowell2@cdc.gov) or by mail to: Division of Violence Prevention, MS F-63, 4770 Buford Highway, NE, Atlanta, GA 30341. Applicants invited to in-person interviews may be required to give a presentation. Applications received by September 15, 2009 will receive full consideration.
