

RESEARCH ANALYST

Closing date: Open until filled

Summary:

The Research Analyst will be a team member of the Data Center at CPWR - The Center for Construction Research and Training, conducting construction safety and health research projects funded by NIOSH. The primary project deliverables are policy research reports and briefs, journal articles, and quarterly/final progress reports.

Responsibilities: The major responsibilities include manipulating and analyzing multiple large national survey data, maintaining databases, preparing PowerPoint presentations, and producing Web-based data reports and paper publications.

Requirements:

- Master's degree: computer science, statistics, economics, mathematics, public health, or other quantitative social sciences preferred
- At least 3 years of professional experience in SAS programming. Knowledge of SUDAAN is a plus
- Strong analytical skills including advanced knowledge of statistics
- Experience working with large national survey data sets (e.g., Current Population Survey, National Health Interview Survey)
- Experience in data graphing and data presentation software (e.g., PowerPoint)
- Attention to detail and good analytical skills
- Strong oral and written communication skills
- Must be able to work well with team members and independently

Other details:

Full-time, career position. Salary is dependent on experience. Excellent benefits fully paid. Equal Opportunity Employer.
