

Job Announcement: Chief, Organizational Science and Human Factors Branch, Division of Applied Research and Technology, National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention.

NIOSH announces a recruitment effort for the Chief, Organizational Science and Human Factors Branch (OSHFB), in the Division of Applied Research and Technology, Cincinnati, Ohio. The OSHFB Chief formulates, develops, conducts, and directs broad programs of occupational health research in work organization and human factors and ergonomics. Research areas include identification of work organization risk factors and intervention strategies for stress, illness, and injury; exploration of changing organizational practices; job and tool design to prevent work-related musculoskeletal disorders; and biomechanics and work physiology.

The position is an Interdisciplinary Supervisory Research Psychologist/Supervisory Research Health Scientist, GS-01801/0601-15 (Chief, OSHFB)

Open: February 14 - March 5, 2008
